

## Magnetic sensor with cable for MPI-R10

### SENSOR

Die-cast zinc alloy nickel-plated body

### CABLE

Shielded cable with black PVC sheath  $\varnothing$  3.5 mm, bending radius when moving  $\geq$  34 mm.

### CONNECTOR (IP67 PROTECTION)

Glass-fibre reinforced polyamide based (PA) technopolymer, black colour, matte finish.  
NBR rubber O-Ring.

### FEATURES AND APPLICATIONS

Snap assembly that facilitates insertion and guarantees correct connection even in the presence of vibrations or accidental tears.

### SPECIAL EXECUTIONS ON REQUEST

Magnetic sensor with cable of different lengths (max. 5 m).

### ASSEMBLY INSTRUCTIONS

- Insert the connector in the appropriate seat of the magnetic measuring system MPI-R10, and push it in until it clicks (Fig.1).
- Fix the magnetic sensor by using M3 screws (not included in the supply). Distance between sensor and magnetic band to ensure a correct reading of the displacement: max 1 mm.

### DISASSEMBLY INSTRUCTIONS

The connector can be removed simply by pulling with your fingers, gripping the appropriate notches. If necessary, use a slotted screwdriver to lever in the housing shown in Fig.2.
