

Indexing plungers

for installation in thin walled equipment, without rest position

SPECIFICATION

Guide Steel **ST**

zinc plated, blue passivated

Pin Stainless Steel AISI 303

chemically nickel plated

Knob Plastic (Polyamide PA)

- black, matt
- not removable

INFORMATION

Indexing plungers GN 607.2 have been developed for installation in thin walled equipment.

It has to be taken into consideration that, depending on the mounting plate thickness 's', the protruding plunger length 'l₁' and the position of the hexagon nut on its centre bush, the plunger nose might not always be fully retractable.

For design reasons the positional accuracy of this indexing plunger is not as precise as plunger GN 607 (see page 769).

- Range of indexing plungers (see page 738)

TECHNICAL INFORMATION

- ISO-Fundamental Tolerances (see page A21)
- Stainless Steel characteristics (see page A26)
- Plastic characteristics (see page A2)
- Load rating information (see page A42)

ACCESSORY

- Double ring spanner GN 607.9 -SW14-SW16 (assembling aid)

Plunger pin retracted

Assembly instruction

GN 607.2
