INFORMATION

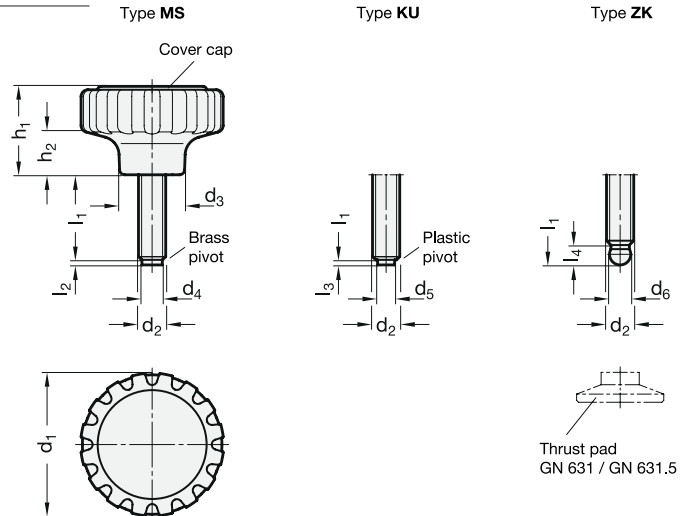

Knurled screws GN 7336.5, type MS/KU with brass or plastic pivots are used when pressure dents or damage must be avoided.

Knurled screws GN 7336.5, type ZK feature a spherical pivot whose $\varnothing d_5$ is smaller than the core \varnothing of the thread. The version with spherical pivot is suitable for holding GN 631 (see page 940) / GN 631.5 (see page 941) thrust pads, which must be ordered separately.

The knurled screws GN 7336.5 distinguish an attractive design in combination with closed shape (no recess on the underside of the handles).

TECHNICAL INFORMATION

- Plastic characteristics (see page A2)
- Stainless Steel characteristics (see page A26)
